Boundaries

Geographical County

Administrative County, County Borough or County of City

Municipal Borough, Urban or Rural District, Borough or District Council

Civil Parish

Borough, Borough or County Constituencies

Heights

Values are given in feet above Mean Sea Level at Newlyn.

Contours are at 25 feet vertical interval.

Surface heights determined by ground survey.

Bench Marks and their values are shown on Large Scale plans, and Bench Mark lists containing fuller and possibly later levelling information are obtainable from the Director General, Ordnance Survey.

THE NATIONAL GRID

TO GIVE A GRID REFERENCE CORRECT TO 100 METRES

EXAMPLE

SWAYNEHAM

The grid letters on this sheet are TQ

EAST

Take west edge of kilometre square in which point lies and read the large figures printed opposite this line on north or south margins.

Estimate tenths Eastwards

42

8

428

Full 100 Metre Reference TQ 428504

The above Full Reference is unique. For many purposes the first grid letter can be omitted, giving a reference Q 428504 which recurs at intervals of 500 Kilometres. If both grid letters are omitted, the resulting reference 428504 recurs at intervals of 100 Kilometres. When the area concerned is sufficiently restricted, as will usually be the case with maps on scales of one inch to one mile and larger, both the grid letters are normally omitted.

At the Eastern edge of this sheet True North is 1° 37' West of Grid North. At the Western edge 1° 34' West of Grid North. Magnetic North was about 9° West of Grid North in 1969 decreasing by about 1' in eight years.

1 square inch on this map represents 17.778 acres on the ground.

The representation on this map of a road, track, or path is no evidence of the existence of a right of way.

SURVEY DIAGRAM
